### FOR IMMEDIATE RELEASE

## **Boost your Bottom Line with better Payroll Metrics with Datavision**

**Datavision offers new Payroll Metrics Module to help control payroll costs and predictive payroll models for your department heads**

For Immediate Release  
Thursday, June 20, 2014

Datavision would like to announce an exciting new enhancement to the system – a new **Payroll Metrics Suite**.

As many people know, payroll is often 40% to 50% of operating expenses at many hotels and resorts. If there is a tool to help reduce or control the payroll expense, it would be a huge boost to the bottom line. Many Datavision customers estimate that using Datavision to stay on top of their labor helps them save 1% to 3% annually. This comprehensive suite of reports is designed for the executive team with the ability to drill into details for the individual department heads.

The Payroll Metrics Suite can be added on to your existing Datavision system. Otherwise, Datavision can deploy the suite on premise or in the cloud.

Some important features:

- Key metrics from PMS, POS, Spa and Golf can be included in the reports
- The data will be synchronized between Datavision and the timeclock daily (catching up on punch edits as well)
- Reports can be automatically sent via email to selected group of users in time for the morning meeting
- Reports compare Actual to Budget, Forecast and Last Year
- System will automatically calculate month end labor projections based on each department's productivity metric

"Datavision provides a comprehensive suite of reports for the entire management team," commented Sudharshan Chary, President of Datavision. "For years, Datavision has been helping a number of our customers understand and control payroll costs, providing accurate and vital KPIs to the management team throughout the property and corporate office."

Here is a sneak peek...

Datavision is successfully used at Pebble Beach Company, Biltmore Estate, Kiawah Island Golf Resort, Sea Island, Hotel Dupont, Ponte Vedra Beach Resorts, The American Club at Kohler, The Pinehurst Resort and other premier hotels and resorts around the world. In addition, hotel companies such as Mandarin Oriental Hotel Group, Aramark Parks and Destinations, Irvine Company, Great Wolf Resorts, and Evolution Hospitality use Datavision to consolidate and analyze data from multiple sites.

Datavision Technologies, the leader in intelligent solutions for the hospitality industry, offers a complete view of the data. Installations include resorts and hotels in the USA, Canada, China, Hong Kong, Macau, Singapore, Japan, Malaysia, Australia, Germany, England, Scotland and others.
